This collaboration can (and should) happen within your firm. But it can also occur within a peer network or with the help of outside consultants. Let go of believing you need to have all of the answers. Solving complex problems requires the collective input of many stakeholders, so listen and involve others in the decision-making process. 3.

Why Adaptive Leaders are Thriving

Using GAI rather than FSIQ in intellectual disability diagnostic decision-making

resulted in fewer individuals being diagnosed with intellectual disability; however, the mean GAI of the disqualified individuals was at the upper end of criteria for intellectual impairment (standard score 75), and these individuals remained adaptively impaired.

Classification of intellectual disability using the ...

Interpretation: Using GAI rather than FSIQ in intellectual disability diagnostic decision-making resulted in fewer individuals being diagnosed with intellectual disability; however, the mean GAI of the disqualified individuals was at the upper end of criteria for intellectual impairment (standard score 75), and these individuals remained adaptively impaired. As GAI and FSIQ were similarly predictive of overall adaptive functioning, the use of GAI for intellectual disability diagnostic ...

As mentioned, intellectual disabilities (ID, formerly mental retardation) have two key diagnostic criteria. These are intellectual functioning (IQ) and adaptive functioning. Tests of adaptive functioning evaluate the social and emotional maturity of a child, relative to his or her peers. They also help to evaluate life skills and abilities.

Tests of Adaptive Functioning - Intellectual Disabilities

Adaptive skills come from adaptive behavior, or the conceptual, social, and practical skills that individuals have learned and use in their daily lives. These skills, in addition to Intelligence Quotient (IQ) scores, are assessed by professionals in diagnosing an intellectual disability.
