All of these engines had a 5.7" connecting rod length, but the wrist pin heights in the pistons were at different locations to mate up with the different stroke lengths. External dimensions and physical features on the 283, 302, 327 and 350 engines are nearly identical. Then there is the Chevy small block 400, a really unique animal.

I have a 1978 chris craft with twin 350 chevys. one of the engines starts and runs great -- for about 20 minutes. It then sounds like it is being fuel starved and shuts down. Wait 15 minutes and starts right up. My mechanics are totally in the dark. Changed filters, carb is fine, changed the coil, nothing works. thoughts?
