Chiropractic treatment is primarily used as a pain relief alternative for muscles, joints, bones, and connective tissue, such as cartilage, ligaments, and tendons. It is sometimes used in...

Chiropractors & Chiropractic Treatment: Benefits and Risks

Chiropractic diagnosis and treatment focuses mainly on the spine. This is because the nerves that branch from the centrally located spinal cord out to all areas of the body have to pass through the sides of the spinal column. Chiropractors believe that if the spinal bones are misaligned, this may negatively affect overall health because the misalignment impedes these nerves.

Chiropractor: Expertise, Specialities, and Training

Treatment When your chiropractor has determined what the problem is, he or she will talk to you about the diagnosis, the possible cause (s) of your disorder, and treatment options. Included is an explanation of how the treatment is given, the number of visits necessary to complete treatment, costs, and expected outcomes.

One of the strengths of chiropractic training is our ability to make a specific diagnosis, especially with neuro-musculo-skeletal problems. When it comes to spinal pain, neck pain, mid-back pain and lower back pain there are many different diagnoses. And it is not uncommon for a patient to have more than one condition at the same time.

Diagnosis and Chiropractic treatment

Chiropractic Treatment Options A chiropractor has numerous treatment methods and recommendations, which may include some or all of the following: Spinal manipulation, which involves the high-velocity, low-amplitude treatment that is usually performed by a chiropractor using hands to make spinal adjustments.

Chiropractic Treatment Plan - Spine-health

Chiropractic adjustment can be effective in treating low back pain, although much of the research done shows only a modest benefit — similar to the results of more conventional treatments. Some studies suggest that spinal manipulation also may be effective for headaches and other spine-related conditions, such as neck pain.

Chiropractic adjustment - Mayo Clinic

Chiropractors diagnose and treat many different spinal disorders that cause musculoskeletal or nerve pain. Similar to other types of doctors, a chiropractor performs a physical and neurological examination as part of his or her process of making an accurate diagnosis. X-rays or CT scan studies may be ordered to confirm your diagnosis.
