Islam and science - The road to renewal | International ...

Using astronomy as a template for tracing the progress of science in Islamic civilization, Saliba demonstrates the originality of Islamic scientific thought. He details the innovations (including new mathematical tools) made by the Islamic astronomers from the thirteenth to sixteenth centuries, and offers evidence that Copernicus could have known of and drawn on their work.

Aims to reject the common narrative that science produce in the Islamic/Arab empires was only translations of Greek science. And that instead, scientists and philosophers of that era indeed translated but also built on, revised, and overturned many of its ideas that directly led and was linked to Renaissance science in Europe.
