System User Manuals | Safetouch Security | Safetouch ...

A security system cannot prevent emergencies. It is only intended to alert you and, if included, your central station of an emergency situation. Security systems are very reliable but they may not work under all conditions and they are not a substitute for prudent security practices or life and property insurance.

PC1616/PC1832/PC1864 User Manual - DSC

The ideal access control system balances the competing demands for security and convenience. It fulfills a wide range of functional requirements with minimum system complexity. It integrates high performance, reliability, and flexibility in equal measure. It is technically advanced yet functionally simple.

Access Controls - Linear Pro Access

The system monitors all protection "zones" and the system's status. The Control Panel displays monitoring information and controls the alarm siren. Your system may also have been setup to send alarm and status reports to a Central Station and may have the capability for 2-way
