Answers - AP Biology 2015-2016

8. Based on your answers to questions 1–7, what simple rule(s) can you use to identify the following macromolecules? carbohydrates Look for a 1:2:1 C:H:O ratio. Many carbohydrates will contain no P, N, or S. lipids Look for a 1:2 ratio of C:H and only very small amounts of O. Most will contain no S. Phospholipids can contain P and N (as

chapter 5 activity 3 4 Answers - North Allegheny School ...

Most organic compounds are built primarily of carbon, hydrogen, and oxygen but in different ratios. Each small organic molecule can be a unit of a large organic molecule called a macromolecule. If the small organic units are identical or form patterns they are called monomers and the large organic molecule they form is called a polymer.

Macromolecule worksheet answer Key.doc

Organic Macromolecules Organic compounds are those that contain carbon (e.g. carbohydrates, lipids, proteins, nucleic acids). For example, a piece of human liver contains 80% water, 12% protein, 5% fats, 2% nucleic acids, 1% carbohydrate and less than 1% of other substances. Many organic molecules are assembled from small repeated units.

Organic Macromolecules - Biology Is Fun

©Science Is Real ANSWER KEY – MACROMOLECULES WEBQUEST Rating Before Learning Scale Rating After 4 I can teach others about the structure, function, and examples of macromolecules. I can teach about monomers and polymers. 3 I can classify macromolecule according to their structure and function.
